Synthesis-NET

SOFTWARE DEVELOPMENT & SERVICE
LIMITED LIABILITY COMPANY

Net Solutions on Demand

WHO WE ARE...

Located in Hungary with partners throughout Central and Eastern Europe,

at Synthesis-NET LLC we aim to provide affordable software development services for public and private sector clients in both Hungary and abroad. Our firm combines the resources and experience of one of Hungary's largest IT firms with the talents of two dynamic young managers to offer high quality e-Business and e-Government software solutions.

Our professionals are reliable, hardworking and, in addition to their technical skills, proficient in several languages (incl. German, English, Hungarian, and Slovakian). We have a strong management structure with a clear vision for the future of the company. As an added benefit to our non-European partners, we are also well versed in EU procurement and project management procedures and thus an alliance with us could offer them access to the enormous EU market.

To achieve our goals, we are seeking long-term strategic partners in Europe, the U.S. and elsewhere who are interested in outsourcing e-Government and e-Business related Web application and software development work to our firm. Our partners can rely on our expertise to satisfy their own development needs or augment their

own in-house capabilities with our professionals on an as-needed basis...

WHAT WE DO...

The services that Synthesis-NET LLC offers its clients include:

1. B2C (Business to Consumer) Internet and Intranet application planning, development, operation; CRM (Consumer Relationship Management) solutions for e-Government, e-Democracy, e-Commerce, e-Catalogue, etc.).

2. B2B (Business to Business) Internet-based application planning, development, and operation (solutions for Web-Services, Supply Chain Management, Item synchronization, etc.).

3. Installation, maintenance and management of IBM and Oracle products (Database products and Web application servers).

4. Document management and office document services.

5. GIS (Geographical Information System) and CAD solutions (Arcview, Mapinfo, and Autocad)

HOW WE WORK...

Our software engineers work in teams in the following technical areas:

- o Relational database planning and programming (IBM DB2, Oracle, PostgreSQL, MySQL, and MSSQL Server)

- o Development of Java-based, n-tier architecture, J2EE application server (running primarily on IBM WebSphere Application Server, but also Apache Tomcat, and Jboss)

The current/planned specializations of our development teams include:

- o DB2 administration
- o Lotus Domino/Notes
- o Portal technology
- o WebSphere MQ (MQSeries)
- o Document management
- o GIS and CAD (Arcview, MapInfo, Autocad, etc.)

WHERE WE ARE...

Development activities occur primarily out of our centrally located 120 m² Győr office. Our Győr base of operations is beneficial in that the city is located in one of Hungary's fastest developing regions on the main transportation routes (road, rail and water) between Budapest and Vienna (approx. 1 hour trip from each city) and in close proximity to Bratislava (less than 1 hour by train or car).
